SITUATION SUMMARY

Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Normal Operations	Normal Operations	Normal Operations	Normal Operations

Cal OES COASTAL REGION

Industrial Facility Fire, Sonoma, Sonoma County

On 06/05/18 at 1333 hours, the Cal OES Coastal Region Duty Officer (CDO) advised the California State Warning Center (CSWC) that the Sonoma County Emergency Services Duty Officer provided information about evacuations due to a fire at an industrial facility with possible propane tank explosions in Sonoma, Sonoma County.

- There were no requests for state assistance and no unmet needs.
- Per the Cal OES Law Enforcement Branch Duty Officer (LDO) as of 06/05/18 at 1508 hours, the evacuation order was lifted.
- Per the Cal OES Fire and Rescue Branch Duty Officer (FDO) as of 06/05/18 at 1711 hours, the fire was contained.
 - The fire was expected to smolder for several hours as crews continue heavy mop up operations.
- Per California Utilities Emergency Association (CUEA) as of 06/05/18 at 1648 hours, 2 power lines were down but not impacting power transmission.
 - PG&E was on scene doing repairs.
- Sonoma County remains at Duty Officer Status and will continue to monitor.

Cal OES INLAND REGION

- Nothing significant to report.

Cal OES SOUTHERN REGION

Virulent Newcastle Disease (vND) in Chickens, Los Angeles and San Bernardino Counties

The California Department of Food and Agriculture (CDFA) has detected virulent Newcastle Disease (vND) in chickens in Los Angeles and San Bernardino Counties.

- CDFA and the U.S. Department of Agriculture (USDA) have scaled up their response to this incident, as more cases have been detected.
- CDFA confirmed there are no commercial premises currently involved and there is no public health risk due to this virus.
- 1 AmeriCorps San Diego Spanish language interpreter responded to conduct surveillance (education/outreach), with a two week rotation.
- California Volunteers continue to locate Spanish language volunteer interpreters.
- The USDA National Incident Management Team (IMT) arrived on 06/01/18 and teamed up with CDFA personnel at the CDFA Ontario District Office.
- The Cal OES AREP [is facilitating a contact with](#) San Bernardino County Solid Waste Management Public Works (SWMPW) [via San Bernardino County OES to determine the possibility of using sites](#) for disposal of backyard dead birds.
 - [USDA is beginning the process of entering into an agreement with SWMPW.](#)
 - [Landfill work group is seeking alternate sources for the disposal of dead birds.](#)
- The Cal OES AREP [discussed](#) California requirements for use and transportation of certain hazardous materials with CalEPA [on 06/05/18](#).

Activations

- San Bernardino Operational Area (OA) Emergency Operations Center (EOC) is activated to Level 3 (lowest level) and will continue to monitor the incident.

Deployments

- 1 Cal OES Southern Region Senior Emergency Services Coordinator (Sr. ESC) deployed to the CDFA/USDA ICP as an AREP with an operational period of 0700-1900 hours.
- 1 Cal OES Logistics Section Chief (Log Chief) [demobilized on 06/02/18](#) from the CDFA/USDA ICP.

SITUATION SUMMARY

Cal OES SOUTHERN REGION (Continued)

Virulent Newcastle Disease (vND) in Chickens, Los Angeles and San Bernardino Counties (Continued)

Logistics

Per the Cal OES Southern Region AREP on 06/06/18 at 0953 hours:

- AREP continues to assist CDFA/USDA in identifying a facility to expand operations in the immediate area of the CDFA district office in Ontario, San Bernardino County.
 - USDA is inquiring with private real estate companies since they have the ability to lease directly as well as the DGS via CDFA.
- CDFA/USDA Logistics has located a facility in Rancho Cucamonga. The facility was inspected on 06/06/18 and appears to be acceptable. USDA/CDFA are currently in negotiations.
- See Fire Activity slide.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

GUSTY W-SW-S COMBINED WITH MARGINALLY LOW RELATIVE HUMIDITY (RH) EAST SLOPES OF THE CASCADE AND SIERRA RANGES FRIDAY AND SATURDAY

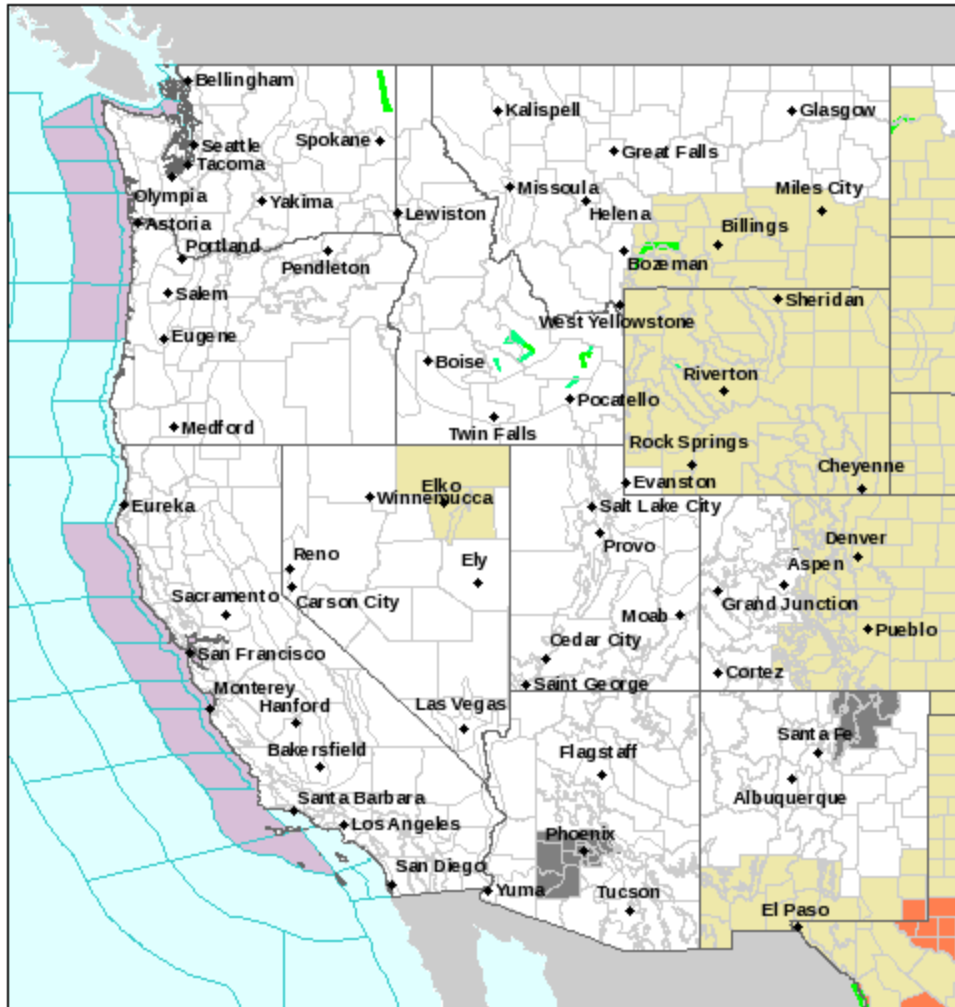

The presence of an offshore trough will affect the region through Friday, then transition to a significant trough passage during the weekend. Temperatures will mimic this trend with near to a little above normal readings through Friday before trending below normal during the weekend. Wind speeds will be the bigger issue. S-SW and W winds will gradually increase today and Thursday with gustier readings found across the Greater Bay area (Delta Breeze) and over the higher Cascade and Sierra ranges. Gusts up to 30 mph possible although locally stronger speeds will most likely impact portions of the Bay Area. The more noticeable pre-frontal wind flow increase will occur Friday and Friday night with residual impacts on Saturday due to the main trough passage. Gusts between 30 to 40 mph will be possible then favoring the east slopes of the Cascade and Sierra Ranges. Humidity readings will be higher along the coast due to a distinct marine influence but some teens will be found within the Sacramento Valley and along the east slopes of the Sierra and Cascade ranges through Friday. A few spot showers and perhaps an isolated drier storm will be possible across the far north during afternoons and evenings on both Thursday and Friday before turning wetter Friday night through Saturday night. Wetting precipitation should impact the northern quarter of the region during this period and due to the cool nature to the system, even snow is possible across the higher elevations Saturday night. A drier northerly flow is projected on Sunday and a much warmer and drier period is shaping up for next week as the jet lifts northward.

SOUTHERN CALIFORNIA

Cooler weather can be expected across interior areas the next two days as a weak trough moves inland. Highs will fall 5-8 degrees in the valleys and lower foothills with highs reaching the 80s both today and Thursday. Northwest winds will continue to be gusty along the central coast and the Kern County Mountains where wind speeds of 20-30 mph will be common. Marine layer coverage will be extensive across Southern California with widespread night through morning low clouds below 3,500 feet. Friday, a weak ridge will bring a bit warmer temperatures, less marine layer coverage and light winds. However, a much deeper trough from the Gulf of Alaska will move inland over the weekend, bringing cooler weather and gusty winds. Sunday will be the coolest day of the outlook period for most inland locations with highs only in the 70s to lower 80s in the valleys. West winds of 20-30 mph with gusts to 40 mph will develop over the mountains – particularly the Sierras into the western half of the Owens Valley - and areas in and near the desert this weekend. Locally strong north winds may develop Saturday and Sunday night across the I-5 Corridor and Santa Barbara County. Next week, expansive high pressure over the Southern Plains will lead to sunny and much warmer temperatures. No thunderstorms are expected throughout the period.
